

## Using Skill Tracker with your students

Skill Tracker is intuitive ATL tracking software which students can use via smartphone, tablet or web browser. In order to support students in logging skills, you may need to remind them on a regular basis until it becomes a habit.

Here are some key moments where you can encourage students to log skill as start tracking their ATL skill development.

### Explicitly Teaching a Skill

After demonstrating a particular skill for your students, allow them a few minutes to log their progress in *Skill Tracker*

### Tutor/Advisory Group

Students can use *Skill Tracker* to log skills that are often the focus of these classes eg communication, interpersonal skills, resilience, risk-taking and reflection

### End of a lesson

After a lesson, allow students a few minutes to reflect on what skills they used during the lesson. Make sure they have a few minutes to log their skill development and include evidence of their learning

### Homework

Remind students that they can log skills when they are completing homework. Students can reflect on what skills they were using while doing homework and log this in *Skill Tracker*

### Sports teams, service and extracurricular

Reflecting on skill development during extracurricular activities by using *Skill Tracker* can promote interdisciplinary learning and skill transfer

### Students working independently

During a period where students are working independently or in small groups, remind them that they can log this activity in *Skill Tracker* as a record of their skill development
